Caplets, 80 ct.

Fighting Colds & Flu

Healthy Habits to Help Protect Against Flu

1. **Avoid close contact** with people who are sick. When you are sick, distance yourself from others to protect them from getting sick.
2. **Stay home when you are sick** to help prevent spreading your illness to others.
3. **Cover your mouth and nose** with a tissue when coughing or sneezing. Flu viruses spread mainly by droplets made when people with flu cough, sneeze or talk.
4. **Clean your hands.** Washing your hands often will help protect you from germs. If soap and water are not available, use an alcohol-based hand rub.
5. **Avoid touching your eyes, nose or mouth.** Germs can spread when a person touches something contaminated with germs and then touches their eyes, nose or mouth.
6. **Practice other good health habits.** Clean and disinfect frequently touched surfaces at home, work or school. Get plenty of sleep, be physically active, manage stress, drink plenty of fluids and eat nutritious food.
